DETAILED ACTION

1. According to a preliminary amendment filed on Feb. 17, 2004, the applicants have canceled claims 1-18 and furthermore, have added new claims 19-33.
2. Claims 19-33 are now pending in the application.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 19-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8, 10-12 and 23-35 of U.S. Patent No. 6,541,485. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant compounds of formula (I), pharmaceutical compositions containing these compounds and method of inducing cytokine biosynthesis or treating a viral disease using these compounds are encompassed by the compounds of formula (I) of the cited patent when X represents a bond, R₂ is alkyl, R₄ is H and n represents 0.

Art Unit: 1625

5. Claims 19-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 19-24 and 27-30 of copending Application No. 10/370,800. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant compounds of formula (I), pharmaceutical compositions containing these compounds and methods of inducing cytokine biosynthesis, treating a viral disease or a neoplastic disease using these compounds are encompassed by the compounds of formula (I) of the cited application when R4 represents alkyl and the bonds represented by dashed lines are present.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
